102nd INTELLIGENCE, SURVEILLANCE AND RECONNAISSANCE GROUP

MISSION

102nd Intelligence, Surveillance and Reconnaissance Group, When federally activated, DGS-MA provides 24/7/365 near-real-time exploitation and analysis of U-2 Dragon Lady & RQ-4 Global Hawk High Altitude ISR missions and MQ-9 Reaper Medium Altitude missions. One hundred percent of DGS-MA's Medium Altitude crews exploiting Full Motion Video (FMV) sensors are certified to execute both Special Operations Forces (SOF) and Sensor Tasking Authority (STA) missions. DGS-MA also provides Geospatial Intelligence (GEOINT) production and analysis in support of the National Geospatial-Intelligence Agency (NGA) under an "operations incidental to training" construct.

Federal Mission: When federally activated, DGS-MA provides 24/7/365 near-real-time exploitation and analysis of U-2 Dragon Lady & RQ-4 Global Hawk High Altitude ISR missions and MQ-9 Reaper Medium Altitude missions. One hundred percent of DGS-MA's Medium Altitude crews exploiting Full Motion Video (FMV) sensors are certified to execute both Special Operations Forces (SOF) and Sensor Tasking Authority (STA) missions. DGS-MA also provides Geospatial Intelligence (GEOINT) production and analysis in support of the National Geospatial-Intelligence Agency (NGA) under an "operations incidental to training" construct.

State Mission: The 102 ISRG is one of 12 ANG Unclassified Processing, Analysis, & Dissemination (U-PAD) sites, supporting the Commonwealth of Massachusetts and surrounding states with Title 32 personnel during domestic operations (DOMOPs) with Information Awareness and Assessment (IAA) capabilities, typically in response to natural disasters.

The Air Force Distributed Common Ground System (DCGS) is the Air Force's primary intelligence, surveillance and reconnaissance planning and direction, collection, processing and exploitation, analysis and dissemination weapon system. The DCGS is currently composed of regionally aligned, globally networked sites. The sites have varying levels of capability and capacity to

support the intelligence needs of the warfighter. One of these components is Digital Ground Station-Massachusetts. DGS-MA, under the control of the 102nd Intelligence, Surveillance and Reconnaissance Group, is a multi-intelligence processing, exploitation and dissemination node within AF DCGS, providing 24/7 capacities. In addition, DGS-MA operates a high-altitude capacity providing U-2 and RQ-4 missions and also provides defense support to civilian authorities such as the Federal and Massachusetts Emergency Management Agencies (FEMA and MEMA) with our UPAD mission during national and regional emergencies and domestic operations.

LINEAGE
102nd Intelligence Group
Redesignated 102nd Intelligence, Surveillance and Reconnaissance Group

STATIONS
Otis ANGB, MA

ASSIGNMENTS
102nd Intelligence Wing

COMMANDERS
LTC James LeFavor, #2008

HONORS
Service Streamers

Campaign Streamers

Armed Forces Expeditionary Streamers
