OPERATIONS¹

The basic function of the 144th CAMRON is maintenance of all aircraft assigned to this base. The unit, which is made up of numerous sub-sections, is capable of maintaining all aircraft armament, electronic systems, equipment and associated aerospace ground equipment necessary for the mission. For effective management purposes, the squadron operates through three major functional areas. They are, office of the chief of maintenance, maintenance management staff, and aircraft maintenance operating sections. By providing centralized control of the over-all maintenance activities and insuring quality maintenance and required availability of combat ready aircraft CAMRON is able to uphold its motto - "Keep 'em Flying
