

526th ICBM SYSTEMS SUSTAINMENT GROUP

MISSION

The 526th ICBM Systems Sustainment Group develops, acquires, modifies, and sustains all ICBM ground systems including power communication, electrical, mechanical, transportation & handling, trainers, ATE, and the software with its associated test & support equipment. We provide mission capable systems & trained personnel in support of the defense of the United States of America. We manage four major acquisition programs: ICBM Cryptography Upgrade, Environmental Control System, ICBM Security Modernization Program and Rapid Execution and Combat Targeting Service Life Extension Program.
