

607th AIR INTELLIGENCE SQUADRON

MISSION

The 607 Air Intelligence Squadron provides the Combined Forces Air Component Command Commander, Seventh Air Force with the Intelligence support necessary to plan, conduct, control and coordinate air operations in Air Combat Command accordance with the tasks assigned by the commander, Air Component Command and the commander, Pacific Air Forces. These activities are Air Combat Command accomplished through the commander, 607th Air Intelligence Group. Specific functions include indications and warning, analysis, targeting, collection management support, exploitation, and dissemination of all-source Intelligence information in support of combat planning, combat operations, Intelligence, Surveillance, and Reconnaissance management, and combat readiness of Seventh Air Force and subordinate units to include theater gained assets. The 607 Air Intelligence Squadron is primarily an Aerospace Operations Center unit. The 607 Air Intelligence Squadron provides substantive Intelligence support to Seventh Air Force, Air Component Command, United States Forces Korea and in-country and deployed unit Intelligence staffs. Day-to-day the squadron commander organizes trains and equips his personnel to perform their roles and missions in the KOREAN Aerospace Operations Center. He ensures the squadron: develops and maintains the ability to immediately support theater combat operations; develops, tests, refines, documents, and exercises armistice/wartime operational procedures; establishes working relationships with members of ROK, allied and other U.S. forces which will enhance wartime effectiveness.

The, Intelligence Analysis Flight is the focal point for all-source Intelligence Preparation of the Battlespace and the Predictive Intelligence Analysis for the 607 Air Intelligence Squadron and the Korean Air Operations Center. Intelligence Analysis Flight provides daily assessments to the commander, Seventh Air Force, his staff, Korean counterparts, and the theater-gained units. During armistice, the analysis flight is designated as Intelligence Analysis Flight. During wartime, the analysis flight integrates as one of the five specialty teams into the Intelligence, Surveillance, and Reconnaissance division as the Analysis, Correlation, and Fusion Flight. The mission of Intelligence Analysis Flight is to provide the Air Operations Center Intelligence, Surveillance, and Reconnaissance division an Air Combat Command accurate picture of the

battlespace and deliver predictive battlespace awareness to enable air component command's war fighting capabilities.

Operations Flight provides the commander, staff and subordinate units of Seventh Air Force with fused, multi-source indications & warning. Provide support for theater SRO missions, ad hoc collections and time-sensitive targeting. Build and validate Intelligence, Surveillance, and Reconnaissance collection strategies and manage validated component collection plans and requirements during armistice, crisis and wartime.

Imagery Flight Provides IMINT support to Pacific Command, United States Forces Korea, Seventh Air Force, Air Combat Command, and subordinate units for production of special imagery requirements. During crisis/wartime, supports the IMINT collection efforts of the Air Combat Command /a-2.

The Readiness Flight exists to prepare all Intelligence units to execute combat operations. Specific responsibilities include: serves as point of contact responsible for overall management and development of all Seventh Air Force and Air Combat Command Intelligence exercise participation; evaluates contingency and wartime plans, polices, procedures, and personnel augmentation; Intelligence planning and participation for exercise Ulchi Focus Lens, the world's largest command post exercise; Foal Eagle, the world's largest air base ground defense exercise; and other exercises as required; plans Intelligence portion of time phased force deployment data document; coordinates the development and implementation of Intelligence annexes orders; serves as the point of contact to ensure all Seventh Air Force and Air Combat Command Intelligence exercise procedures are realistic, meet command objectives, unit readiness requirements, and coordinates development of scenarios and procedures which are realistic, meet command objectives, test wartime procedures and readiness, and provide a method for identifying serious war fighting procedural problems; focal point for Intelligence support to peninsula wings and units tasked to deploy to theater in response to tasking; responsible for Seventh Air Force training range imagery requirements; acts as theater point of contact for unit deployment/contingency issues; reviews and coordinates on a semi-annual basis with provisional wings all co-located operating base focal point for Joint Worldwide Intelligence Communications System secure video-teleconferencing; during exercises, is responsible for the development and execution of the Air Combat Command Intelligence control cells and evaluation functions.

Target Development Flight provides Seventh Air Force commander and the Korean Theater Air Control System with all-source target Intelligence to plan, direct and control air operations with combined forces command components and allies during armistice, war or contingency.

Systems Flight provides superior Intelligence systems support to ensure the combat effectiveness of the 607th Air Intelligence Squadron during armistice and wartime through timely and focused customer support of small computers, theater battle management systems, and national and theater sensor systems and through proactive advocacy and planning for Intelligence-related systems requirements. Provide effective augmentation to Intelligence and

shelter management work centers as required during exercise and contingency.

The squadron comprises six flights of approximately 180 officer and enlisted personnel.
