1 Jul 1990 - [1] Jun 1992

Army Meritorious Unit Commendation, 1 Jan 1944-24 October 1945

EMBLEM

First emblem: The seal is common to the area in which the 11th Weather Squadron operates, while the gray overcast sky and the volcanic island are also typical of that region. The anemometer and thermometer, standard items of weather equipment, indicates the squadron's missions.

Second emblem: The predominant colors are Air Force blue and golden yellow to indicate that the squadron is a unit of the U.S. Air Force. It is divided into three parts to represent the unit's threefold mission: support to the Alaskan Command, to the Alaskan Air Command, and to the U. S. Army, Alaska. The frontal pattern, separating the three parts of the emblem, represents the forecasting function of the squadron; the igloo on a snow-covered point of land represents the remote site observing function. The anemometer symbolizes the relationship of the squadron with the Air Weather Service. The blue and gray skies represent day and night operations while the sun and the lightning bolt respectively represent the fair and foul weather which is observed and forecast. The snow-capped mountain peaks and the igloo are representative of the general region in which the squadron operates.

Third emblem: On a disc Azure, above a base of three mountains peaks Purpure, snowcapped Argent, the constellation Ursa Major of six mullets below in chief an anemometer of the last fimbriated Or, the mounting bar flory Yellow, all within a diminished bordure Yellow. Attached below the disc, a White scroll edged with a narrow Yellow border and inscribed "11TH OPERATIONAL WEATHER SQ" in Black letters. Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The three mountain peaks represent the unit's support to the mission of the Alaskan Command, Alaskan NORAD Region and U.S. Army, Alaska. The Big Dipper constellation denotes the squadron's alignment with and support to the 11th Air Force. The anemometer symbolizes the commitment to excellence in weather forecast operations and the snowcapped mountain peaks allude to the unit's home location and operating conditions. (Approved, 13 Jun 1961)
