ASSIGNMENTS

Wright-Patterson AFB, OH, 24 Jun 2022

COMMANDERS

HONORS

Service Streamers

Campaign Streamers

Armed Forces Expeditionary Streamers

Decorations

EMBLEM

Platinum is the distinctive color of Space Operations Command. This represents the strength of SpOC's uniformed and civilian Guardian's, the rarity of its calling, and the nobility of its mission. The design incorporates elements that both recall the organization's NASIC heritage while simultaneously looking towards the future that spurred its formation. The majestic sphinx – an ancient symbol of wisdom, knowledge, and the challenges that NSIC analysts will solve – is invoked out of pride in an organization that traces its roots back to the earliest days of aerospace intelligence. It sits omnipresent over the world – just as the domain the analysts of NSIC will monitor and help to protect and defend – and gazes upwards, drawing the viewers eye from the past into the future and the blackness of space. In that blackness, a Northern star is prominently displayed. Its eight points of the star symbolize the points of a compass, displaying how NSIC intelligence professionals will analyze and assess to guide the United States acquisitions, policymakers, and warfighter communities through this new frontier.
