MOTTO

NICKNAME

OPERATIONS

The northern route over the Pacific from the United States to Japan traveled north to Alaska and down the Aleutian Islands chain. There were air bases at Anchorage, Adak, Shemya, Cold Bay, and Kodiak. Several of these former World War II bases had to be reactivated. AACCS operated control towers, ground controlled approach radars, radio and radar beacons, radio ranges, high and very high frequency direction finders, cryptological facilities, and point-to-point communications.

These facilities, all of which were operational by mid-July, were under the control of the 1804th AACCS Group in Alaska.
