

43rd AIRLIFT WING

MISSION

The wing operates two squadrons of C-130 Hercules. Capable of deploying a self-sustaining war fighting package anywhere in the world at the moment's notice, the 43d team with the major elements of nearby Fort Bragg, forms our nation's premiere forced entry capability with the United States Army. To carry out these missions, the wing employs two operational squadrons: the 2nd and 41st Airlift Squadrons, flying the C-130 capable of delivering troops, supplies, and equipment directly to the battlefield in all weather conditions. It can also provide theater airlift for other contingencies and humanitarian missions around the world.

The 43 AW consists of four groups: the 43d Operations Group; the 43d Maintenance Group; the 43d Mission Support Group; and the 43d Medical Group.

LINEAGE

43rd Bombardment Wing, Very Heavy established, 3 Nov 1947

Organized, 17 Nov 1947

Redesignated 43rd Bombardment Wing, Medium, 1 Aug 1948

Inactivated, 31 Jan 1970

Redesignated 43rd Strategic Wing, 4 Feb 1970

Activated, 1 Apr 1970

Redesignated 43rd Bombardment Wing, Heavy, 4 Nov 1986

Inactivated, 30 Sep 1990

Redesignated 43rd Air Refueling Wing, and activated, 1 Jun 1992

Redesignated 43rd Air Refueling Group, 1 Jul 1994

Inactivated, 1 Oct 1996

Redesignated 43rd Airlift Wing, 31 Mar 1997

Activated, 1 Apr 1997

Inactivated, 1 Mar 2011

STATIONS

Davis-Monthan Field (later, AFB), AZ, 17 Nov 1947
Carswell AFB, TX, 15 Mar 1960

EMBLEM

Per fess nebuly or and azure, all within a dimished bordure argent (silver gray). **SIGIFICANCE:** Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The nebuly fess reflects the Wing's interlocking of personnel and mission. (Approved, 18 Nov 1993)

MOTTO

Willing, Able, Ready

NICKNAME

OPERATIONS

Strategic bombardment training, 1947-1960, and air refueling, 1949-1960.

During 1948 the 43d Bombardment Wing became the first Air Force Unit to be equipped with the new Boeing B-50 bomber. Ground schools and air training were the order of the day as combat crews and maintenance personnel became acquainted with their new weapon. The transition to the new aircraft was a matter of great interest to all, particularly to the flying personnel who were much impressed by the performance of the B-50.

In January 1954 the 43d Bomb Wing received its first B-47 Stratojet. A B-47 from the 43d Bomb Wing, between 17-19 November 1954 completed the longest jet flight on record covering a distance of 21,163 miles.

A decision by Headquarters USAF in December 1959 called for the 43d Bomb Wing to become the first B-58 equipped wing in SAC and the first supersonic bombardment wing in USAF.

On 1 August 1960, SAC assumed executive control of the B-58 program and the Category III Test Phase of the B-58 program was begun. The Category III Testing terminated on 31 July 1961 and on 1 August 1961 the B-58 Operational Engineering Section (OES) assumed the responsibility for all future evaluations of the B-58. The B-58 OES was officially terminated on 1 June 1962. With the termination of the Category III Testing on 31 July 1961 the mission of the 43d Bomb Wing changed. As of 1 August 1961 the mission of the 43d Bomb Wing was to conduct a combat crew training program and to support the B-58 Test Program.

With the forthcoming activation of the 43rd Bomb Wing at Carswell as the first operational B-58 unit, the AF began actively to recruit crew members. Requirements, due to the aircraft's unique performance characteristics and maintenance needs, were among the highest for any aircraft in the AF inventory. Additionally, due to the dimensional limitations of the crew accommodations (which were later compounded by the addition of the encapsulated ejection seats) there were strict physical limitations on crew member height and weight. Ground crews tended to be hand-picked, and per the recommendation of the June, 1960, accident committee, they usually represented personnel with exceptionally high skill levels and lengthy service careers.

Approximately 1,500 personnel were eventually assigned to the maintenance activities of each of the two B-58 wings (43rd and 305th). Because of the unique structural aspects of the B-58, field maintenance required a high percentage of fully qualified personnel. Three maintenance men were assigned to each aircraft. The special problems emerging from the aircraft's unique fuel and weapons pod were assigned to a separate Muniton Maintenance Squadron. The complex subsystems and unusual configuration of the B-58 called for a variety of special ground support equipment.

Maintenance of the B-58's armament and electronics was especially critical because of the fine tolerances required for proper operation of its Doppler-inertial navigation and guidance systems and advanced bombing systems.

In Apr 1970, the wing replaced the 3960 Strategic Wing at Andersen AFB, Guam. On 1 Jul 1970,

the 43d also assumed tasks formerly handled by the Bombardment Wing Provisional, 4133, including a combat mission. Employed attached aircraft and aircrews of other Strategic Air Command units to participate in "Arc Light" combat missions in Southeast Asia from 1 Jul to mid-Aug 1970, and again from Feb 1972 to Aug 1973. Following the end of combat operations, provided routing training and ground alert with B-52 and KC-135 aircraft, the latter provided by other Strategic Air Command units on loan.

During 1975, provided logistical and medical support to thousands of Vietnamese refugees evacuated from their homeland and located temporarily at Guam awaiting resettlement in the United States. Trained to remain proficient in strategic and conventional warfare capabilities. Beginning in 1974, controlled TDY tankers and crews participating in the Pacific (formerly Andersen) Tanker Task Force that supported Strategic Air Command operations in the western Pacific.

Assumed an airlift role in Apr 1997. Crews and aircraft deployed to Europe and Southwest Asia for expeditionary rotations and contingency operations such as the enforcement of no-fly zones over Iraq. Took part in humanitarian airlift operations and training exercises, often with U.S. Army airborne organizations stationed at nearby Fort Bragg. After terrorist attacks on the United States on 11 Sep 2001, elements deployed in support of the global War on Terror.
