EMBLEM

48th Armament and Electronics Maintenance Squadron emblem

48th Component Maintenance Squadron emblem is symbolic of the unit, the Air Force, and the national colors. Ultramarine blue, red, white, and golden yellow are used in the design. The color blue alludes to the sky, the primary theater of Air Force operations, as well as being one of the national colors, and golden yellow to the sun and the excellence of the personnel in assigned tasks. Red, as part of the background, is the second national color used. A white sword across the

red, gold, and blue background completes the national colors, and is indicative of the strength and capabilities of the squadron. The encircling electrons are indicative of the very nature of the 48th Component Maintenance Squadron's mission. The white banner above the emblem, with the words in blue, "STATUE OF LIBERTY WING," symbolizes that the squadron is an integral part of the 48th Fighter Wing. (Approved, 20 Apr 1976)

MOTTO

NICKNAME

OPERATIONS

THE 48th Armament and Electronics Maintenance Squadron came into being in 1958, as a new member of the 48th Tactical Fighter Wing. The mission of this somewhat younger squadron is to provide organizational and field level maintenance on the Armament and Electronics systems in all aircraft assigned to this wing. and to accomplish the loading of weapons on unit mission. aircraft when required.

Success of flying missions undertaken by the Super Sabres of the 48th Tactical Fighter Wing depends to a great extent on the men of the 48th A. and E. Squadron and its new commander, Major Charles M. Mooney. The former commander, Major Jack H. Kennedy, Jr., has just recently moved into the Chief of Maintenance slot for the 48th TFW.

The men of the A and E Squadron maintain a standard of peak efficiency to support the great striking power of the F-100.

The squadron maintains a high membership in the base Rod and Gun Club in addition to various other sporting activities, and their insignia, an Electrode in Shield, symbolizes the importance played by electronics in the defense of our country.
