EMBLEM

60th Maintenance Squadron emblem: On a disc Azure, a demi-globe Vert gridlined of the field issuing from base charged with a Phoenix rising Gules emerging from flames Proper, all within a narrow border Yellow. Attached above the disk, a Blue scroll edged with a narrow Yellow border and inscribed "PROUD AND DETERMINED" in Yellow letters. Attached below the disk, a Blue scroll edged with a narrow Yellow border and inscribed "60TH MAINTENANCE SQ" in Yellow letters. **SIGNIFICANCE:** Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The Phoenix, a legendary bird that consumed itself by fire and rose renewed, represents the history of the Squadron. The globe, from the emblem of the Air Mobility Command, refers to the command that the Squadron supports.

MOTTO

NICKNAME

OPERATIONS

On June 6, 2008, the men and women of the 60th Component Maintenance Squadron and the 60th Equipment Maintenance Squadron will trade in their old squadron hats for new ones reading 60 MXS, representing the reactivated 60th Maintenance Squadron. Both squadrons will consolidate in order to meet the changes to Travis' force structure, reduction in manning and better utilization of assets and manpower toward the Global War on Terrorism. The merger order calls for an inactivation of 60th CMS and a redesignation of 60th EMS to 60th MXS. Both squadrons have experience with realignments and share a rich history at Travis.

"In today's environment, we're all looking for ways to keep our heads above water and make the mission happen every day," Major Huester said. "Our challenge in the next few years is to effectively swing capability to where it is needed most. Merging squadrons combines critical and

increasingly scarce back-shop resources under one umbrella and allows us to better meet the varied needs of our three airframes and the people that support them." From the production perspective, aspects of the merger will immediately be beneficial. Various agencies supporting C-17 Globemaster III and KC-10 Extender scheduled maintenance will now fall under one roof, opening the door for improved communication, coordination and prioritization which should ultimately translate into decreased aircraft inspection flow times, improved flightline support and the timely return of mission-ready airframes back to the fight. From the people aspect, there will be myriad typical integration challenges.
