

CENTER FOR AEROSPACE DOCTRINE, RESEARCH, AND EDUCATION

MISSION

The Center for Aerospace Doctrine, Research, and Education conducts basic and applied aerospace power research; assists in developing, analyzing, and testing concepts, doctrine, and strategy; provides specialized educational assistance and publication support for AU academic programs; and conducts computerized war gaming for the Air Force. The center conducts the Senior Officer Combat Employment Course for major generals.

OPERATIONS

On 10 December 1982, HQ USAF constituted the Air University Center for Aerospace Doctrine, Research, and Education (CADRE) and tasked the new organization to research, formulate, analyze, test, and publish doctrinal and concept studies. The new organization would also embrace the Aerospace Studies Institute, the Air University Press, and the projected Command Readiness Exercise System. Air University provided 70 manpower authorizations from its existing resources to get CADRE off the ground and anticipated adding 24 more slots in FY 85 with the establishment of the Command Readiness Exercise System.
