## OPERATIONS

The Federal Computer Performance Evaluation and Simulation Center, located in the Washington, D.C. area, was established in 1972 by the General Services Administration to provide computer performance evaluation services to all agencies of the federal government. The Air Force, in recognition of its expertise in the field of data automation, was designated as the operating agency by the General Services Administration. The Center, funded by the General Services Administration, provided, on a fully reimbursable basis, technical assistance, support and services for the federal government of simulation, analysis, and performance evaluation of

automatic data processing systems.
